

# Lean construction fundamentals

## Location

Onsite

## Duration

One day

## Price

TBA on proposal

## No. delegates

Maximum of 20

Please note certificates of attendance or accreditation will be issued on receipt of payment and attendance.

## Who should attend?

Lean construction fundamentals is aimed at professionals across all segments, disciplines, and levels of the construction sector.

## Overview

This one day course aims to provide learners with an understanding of lean construction fundamentals and how these can be applied to construction projects from design phase through to construction and operational phases.

This course is the first stage of learning for construction professionals aiming to further their knowledge and skills in this field.

## Learning outcomes

By attending this programme delegates will be able to demonstrate that they understand:

- the key drivers for implementing lean construction.
- the history of lean and its adaptation in construction.
- the fundamentals of lean construction principles: customer value, 5 lean principles, 3 elements of work, 7+1 wastes, plan-do-check-act (PDCA) approach to continuous improvement.
- the fundamentals of the lean construction toolkit.
- fundamentals developing organisational lean maturity.
